

Should Students Do Part-time Jobs?

3A Cindy Chan Ching Ni

I think students should not do part-time jobs. There are two reasons. Firstly, doing part-time jobs will affect their studies. Doing part-time jobs might take up their time after school so that they have no time to do their homework and revision.

In my class, one of my classmates has a part-time job. He always sleeps during the lesson. So, it is clear that doing part-time jobs will affect a student's study.

Secondly, it is not necessary for students to earn money by doing part-time jobs.

It is because the wages for doing these jobs are usually very low! For example, in McDonald's, the wage is only fifteen dollars per hour! Only fifteen dollars! Why don't they just stay at home and ask their parents to give them pocket money?

So, I think that students should not do part-time jobs. It is just a waste of time.

How is the amount of time available to you going to affect your language learning?

3B Chan Ying Chi

Today, English is very important because it is an important language and having good English is essential for our future career.

Normally, as secondary students, we can learn English at school or by watching English television programmes at home. However, I do not think that it is enough to improve our English. Strictly speaking, everybody has 24 hours a day. A hard-working student will have reasonable achievement but a lazy guy will have far better English if he comes from the place where he uses English as his mother tongue. Therefore, the most important point is the environmental factor. It will be a very good idea if we can make learning as natural as possible. If this can become true, learning English will not be difficult anymore. On the other hand, it will be very tedious as we force ourselves to learn something which has no relationship to our daily lives at this stage even though we know that it will be useful in the future. In reality, the learning outcomes will be better if we can relate learning to our daily lives directly. Children can learn language fast since they like talking and they do not need to work. Why are we so eager to learn a language in school? Perhaps, having a right method is more essential than thinking about spending how much time on learning a language. Moreover, I think that we should start by speaking more rather than just learning vocabulary.

To conclude, I believe that the first thing is to get hold of speaking a language before thinking about writing. A helpful environment is very important.

Our School in 2050

1A Li Yu Ho

In 2050, there will be a big change in our school life. Our school will be in space! I will go to school by rocket. I don't have to take any books because in our school we can use the computers. On the computer, we will find all the subjects.

In school, students will wear school uniforms. The school uniforms will be very beautiful. They will be made of cotton which can keep us warm. After we wear the uniforms, we will become weightless and we can fly.

At home, the students will use the computer to send their homework to their teachers. The teachers will be in space and our home will be on the Earth.

I think that my school life will be very interesting. I will love going to school!

Our School in 2050

1A Lai Po Ki

In 2050, there will be a big change in our school life. The school will look like a playground. We'll go to school from 10:00a.m to 3:00 p.m.

There will be school jets. Everyone will have two wings and we can fly in the sky.

The students will not wear school uniform to school. We will have special lessons. We will have flying lessons and driving lessons. We can sleep in a sleeping room when we want to take a rest. Everyone will have his own bed. Children will fly out of the school to have lunch. We have two hours for lunch.

We will not have any classrooms. We can start the lesson everywhere. There will be many robots in our school because the robots are the teachers. These robots will be like our teachers now. There will be no staff room because they will not feel tired and will not need a place for taking a rest. We will not have any test, exam and even homework.

I think there will be many special changes in our school life. When we can have fun and feel happy in the new school life, I will be very interested in learning there. I think I will be happy every day.

Fire at SFCC

1B Chan Yin Fong

Hello, this is Yvonne Chan from TVB Pearl and I am reporting on the fire at SFCC.

The fire started in the English Room on the first floor. The even number 1B students were in the room at the time. We found a student who was there and we had an interview with her.

“Hi Ying. I am Yvonne Chan from TVB Pearl. Can you tell me about the fire at the English Room?”

“OK. The fire started from a pile of paper. At first, we didn’t know there was a fire, but after a few minutes, we smelt something burning. We knew it was a fire. So our whole class and Mr. Furlong, the class teacher, went out of the room and phoned 999 for the police. Now, the fire is out and the teachers and students of the whole school are safe.”

“Thank you, Ying. This is Yvonne Chan signing off.”

The Magic Forest

1B Lau Wing Shan

One day, I was in a magic forest. In the magic forest there were many magic animals. I saw a lion cub. It was very cute. I ran past it and saw the 'Magic Snack Shop'. It was very big. I opened the door. When I entered the shop, I saw a box. I opened the box and looked inside. There was a puppy eating some snacks inside the box.

Next, I saw a room. I knocked on the door and entered. When I entered, I saw an old woman sleeping. She was a magic woman. In this room all the things were about sea animals. The room was a sea! The old lady woke up and looked at me, but she lived in her dream. "Oh, I'm late," she said.

Then I left the shop.

Outside, I saw a tree that was shining. I went to take a look and climbed up the tree. I was in heaven.....

The Touring Car Show

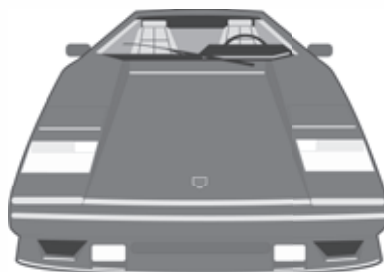

1B Peter Lam Siu Fung

In the USA there are many touring cars. We can see them in New York, and there are many drag races there.

My friend John is a Drag Racer. He has won many races and he has a lot of experience. So I asked him to teach me. I drive an American Muscle Car. It has 600 horsepower and can go from zero to 60 mph in 3.7 seconds. It's very fast.

I went to Drift place. I met Marco there and we went to the Drift Movie Centre to see the Ford Mustang GT in 'Inferno on the Raceway Circuit'. It was top speed is 345 kmh, it has 505 horsepower.

Let me introduce the best Japanese car, the Honda NSX. Toyota has the Super and Nissan has the Fairlady Z and Skyline GTR. They all have 280 hp. I think this is my experience of the touring cars.

It Happened Last Friday...

2A Hsu Fung Wing

Yeung Ka Yan

Liu Tsun Yin

Sham Yuen Sing

It happened last Friday night. I saw a ghost in my home.

She wore red clothes and she had long hair. "Tomorrow evening you will die!" she told me. Then she disappeared. I was very frightened. I turned on all the lights in my home.

The next day, I woke up early. I ate breakfast. When I was cutting the fruit, I carelessly cut my finger.

In the evening when I was sleeping, a woman came to my bedroom. She wore red clothes and had long hair. I knew she wanted to kill me. I pushed her out of the way and she ran and ran and ran but she caught me. I ran faster. She caught me again. She took a knife and thrust it into my heart. "Oh!" I screamed as I died.

"Oh my God," I shouted. It was just a dream. A crazy dream.

Later, while I was eating my breakfast, I saw a woman wearing red clothes. She had long hair. "Oh my God!" I screamed. "I can't believe it. The dream is true. The ghost wants to kill me! She was holding a knife.....I felt very frightened....."

2045

2B Anna Chan Siu Ngo

In the year 2045, nearly all the businessmen use Voice Recognizing Computers. It is a kind of computer that when you talk, it types your words by itself.

Ben was the richest businessman in the world. He was doing a really big deal that would make a huge profit. When he was trying to sign the contract; the Voice Recognizing Computer broke down.

What? Hey! Come on!" Ben shouted loudly.

"So," said his partner, "Now what? I guess we will have to type it by ourselves." So he ordered someone to do the typing.

"But, I don't know how to spell all the words." said the person doing the typing, "We don't do spelling now that we have Voice Recognizing Computers."

Ben asked all of the people if they knew how to spell. Finally, all of them went home and brought back something that had not changed for years. It was a dictionary. All of them started checking the dictionary. At last, in five hours, they finished the contract!

Now Ben knows that hi-tech machines do not mean that we could stop learning.

I want to fly

2B Michelle Ma Kwok Tsun

Perhaps it is time to think about 'life'. Let me tell you what I think. I have to work hard in my life because working hard is my duty.

I once thought about my future. I want to share my opinion with you. I hope to be an airhostess. Because being an airhostess, I can know more about cultures of different places. It is not easy to be an airhostess. If I want to be an airhostess, I cannot wear glasses, I need to know many different languages. I have to be friendly, cheerful, outgoing and sociable. If my dream can come true, I can travel to France because France is my favourite country. It is so romantic. I hope to visit Louvre Museum because I can see a lot of paintings and I appreciate them.

I really hope my dream will come true!

One Day in Future

2B Pang Cheuk Yi

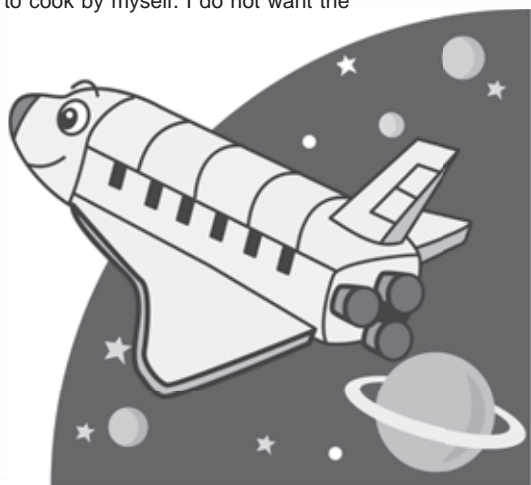

My name is Alice. I am studying S2 in Future College. I am unhappy everyday because students in this world do not need to go to school. There are many holidays. We can study on computers or on mobile phones.

It is morning now. My robot is calling me to wake up. The history teacher said we used to use microwave ovens to cook in the past. It is cooked by robots now. The robots are very clever. They always know what the people want without asking. People just need to use their eyes to signal the robot and the robot will understand.

I need to go to school today. I take my flying bicycle to go to school after I have eaten my breakfast. There are many UFO's and flying cars in the sky. If I want to drive a flying car, I need to pass the Flying Car Exam when I am eighteen.

There are three lessons today. They are Music, English and Chinese. We study English and Chinese on the computer. We use MP10s to listen to the songs that we need to study and sing by ourselves. I forget to bring my MP10 but my robot brings it to me.

I think I am happy today. But I want to cook by myself. I do not want the robot to cook for me.

If I Had Three Wishes

2C Chung Kai Hung

If I had three wishes, I would like to become the richest man in the world first. I would like to help the poor. Some people cannot live well because they are really poor. Therefore, I would like to help them.

My second wish is to be the happiest person. I think joy can keep me young and I will never be unhappy. If I had any problems, I would be able to solve them happily.

My third wish is to travel around the world. I would like to play all interesting things like skiing in the North Pole and eating fresh fruits in Thailand. I will travel around the world by plane or ship. I can enjoy the aerial view and the life on the ship.

These are my three wishes. I wish that they may come true.

If I Had Three Wishes

2C Leung Ka Wai

If I had three wishes. First I would like to be a happy person. If I were happy, I would always smile. I would not be unhappy in the future and I would not cry.

Second, I would like to be the richest person in the world. If I were rich, I could buy a lot of food because I like eating very much. I would travel around the world, too. I would like to do shopping in different countries and I would donate money to the poor.

Third, I would like to have more wishes. If I had more wishes, I would like to be a cook, a singer, a doctor, etc.

But the most important thing is that I could cook delicious dishes for my mother because she cooks delicious dishes for me every day. I want to reward her. I would also like to cook delicious food for the poor, because they often do not have enough to eat.

My Dream House

2E Li Wai Tat

My dream house would be in Thailand. I want my house to be near a beach which has a good sea-view. I like it to be big and there should be a lot of rooms, such as a gym room, bedrooms, bathrooms and a kitchen. There should be a security guard.

I would like to have a basketball court and football pitch on the second floor. There should be many computers in my bedrooms. My friends could come and play basketball, football and computers in my house. There should be food in a very big fridge. I would be really happy!

If I were a Dolphin...

3C Ma Ga Ga

I was a little dolphin. Every day, I swam in the sea with my family. It was very free. I enjoyed this time very much.

In the morning, I woke up and had breakfast. My dad taught me how to catch fish. After breakfast, I would swim in the sea. Sometimes, when I was swimming, I could see some ships and I could see the human beings working on the ships. 'What are they doing?' I asked myself. So I swam near the ship. Oh! I saw the human beings were catching other dolphins! I had to run away at once!

In the afternoon, I told my mum what I had seen. 'Why do the human beings catch us, mum?' I asked. 'They catch us to eat and sell us to some underground businesses. Son, when you see the human beings, you must run away as fast as you can! They would kill us. Many dolphins have been killed by humans,' my mum said. 'What can we do?' 'I'm sorry, son. We can do nothing to change our life.'

I was so disappointed about this. I thought that I had to do something to save dolphins' lives.

In the evening, I swam near a ship. I saw some children playing on the ship. They were catching some little fish. I thought I had to tell them something.'

'Hey! Kids! Don't catch any fish and dolphins, please!' I said loudly. 'Oh! Little dolphin, we are so bored, if you play with us, we will tell our parents to stop killing dolphins. Is that ok?' The child said.

'Ok, I will play with you.' I answered him. When we were playing, the kids' parents came. 'Hey, dad! The dolphin is playing with us. Let's catch it!' One kid said.

'What! You told me you wouldn't catch dolphins again!' I said loudly. 'I was just joking, little dolphin!' The kid laughed and his dad used the net to catch me.

I could not get away any more.

'Thank you very much, little dolphin. You helped us to earn lots of money,' the man said.

'Oh, I am so foolish. I can't believe the human beings.'

If I were an Elephant...

3C Eric Ng Chun Yin

I was an elephant. I lived in Africa. When I woke up every morning, I could see the beautiful sunrise. Then, I always went to the river and took a bath. After that, I went to eat my breakfast. Whenever I could not see the hunters, I felt very unhappy because they often hunted for the elephants. The hunters always turned up to work in the morning and at night. So, I had to be very careful.

In the afternoon, I always felt very tired because I spent much energy doing many things. I was a mature adult elephant, so I needed to take on a lot of responsibilities. So, I always wanted to take a rest. But I could not do it because many animals woke up in the afternoon. Some of the animals, like tigers and lions, would hunt. They always chose to kill an elephant. So when I slept, they would attack me and I had to stay on high alert. I could not beat them when we fought. Also, in Africa, the temperature was very high. I went to the big trees to sit down. I would feel very cool there.

At night, it was the most frightening moment in a day because hunters always attacked the elephants! My tusks were very beautiful. The hunters killed the elephants because they wanted to cut our tusks for ivory. My tusks were also very expensive! So, I had to find many places to hide. I did not like this kind of livelihood. I wished I could feel happy everyday. Now, I should hide away! I did not want to be killed!

In the world, I hope human beings will help to preserve endangered species. Harsh penalties should be imposed and habitats should be built.

A letter to a new pen-friend

1A Wong Hoi Ching

Dear Tracy,

Hello! My name is Wong Hoi Ching. I am a girl from Hong Kong. I am quite short and thin. I have long black hair and I wear glasses. I am eleven years old. I am very nice and kind to my classmates. I am studying in Sun Fong Chung College. I am in 1A. How about you? Are you pretty or kind and friendly? My native language is Chinese. What is your native language?

My favourite sport is badminton. I enjoy playing badminton. My hobbies are playing the piano and dancing. I don't like football but I like basketball. I enjoy watching TV and playing the piano. My favourite pianist is Li Weng Di.

I have one brother and one sister. My ambition is to be a pianist, a dancer or a singer when I grow up. How about you? Please tell me.

Bye-bye!

Best wishes,
Heather

My Collection

My collection is 'Hello Kitty' dolls.

I love 'Hello Kitty' dolls because these toys are reversible. When I turn some of them inside out, they will become other things, like apple pie, coke, ice cream and French fries. When I turn the inside out, they will become a football player and the cheering team.

This item is collected from McDonald's. You buy the food and the doll for eighteen dollars. Then you can take the doll back home. I like my 'Hello Kitty' dolls because the dolls were given to me by my mother. They are very meaningful. I have one doll which was given to me by my father as a birthday present. So I love the 'Hello Kitty' dolls.

I think the 'Hello Kitty' dolls are very expensive. My family loves 'Hello Kitty' dolls, too. There are many 'Hello Kitty' ornaments in my room. And I have a lot of 'Hello Kitty' stationery. When I was young, I had many clothes with 'Hello Kitty' on them. I am twelve years old now, so my mother gave these clothes to others.

A Letter to the Parents

2B Steven Man Ka Ho

20th October, 2004.

Dear Parents,

Our school will organize a “Care Day” to raise money for the Community Chest of Hong Kong to help people in need. We have created many ideas, because we hope you can support this activity. For example, our students will go to the streets and help some people who have problems. They will have lunch time programs on sports activities and a song dedication. These are our main ideas. If you have any ideas, you can call me or write down your ideas and email them to me.

We also hope that you, dear parents, can donate money to the Community Chest of Hong Kong or encourage your children to join the programs. We hope you can support our function. If you really support us, you can tell your children. They have each a piece of paper for you to write down which activity you want to join or support.

Lastly, please sign your name on the next page and give it to your children to hand in on 30th October, 2004.

Thank you for your attention!

Principal
S.K. Ng

A Letter to the Parents

2B Wong Yee Ching

Dear Parents,

Our school, Sun Fong Chung College, will organize a 'Care Day' to raise money for the Community Chest of Hong Kong to help the people in need.

We want to hold some activities on 24th November, 2004. On that day, we want to sell some cookies and bookmarks. We will also organize some interesting games, for example, treasure hunt and crossword puzzle. We will organize football, volleyball and basketball matches for our schoolmates. We want to invite some old people come to our school. We will hold some indoor activities for them, including Chinese song dedication. We will do a play for them. We hope we can have enough money to give them a free lunch. We want to invite parents to join our activities, too.

We hope our schoolmates and parents can donate money to the Community Chest of Hong Kong for this activity. We believe you will be pleased to help the needy. Our slogan is 'Happy in helping people'. Please join our activity on 24th November.

Yours faithfully,
S.K. Ng

Care Day

2B Gigi Law Wan Tung

Dear Parents,

Our school will organize a Care Day to raise money for the Community Chest of Hong Kong to help the old people. Some old people are very poor, they always fall ill and they have no money to visit a doctor. They live alone because their family members have passed away. So, I would like to ask you to support the activity.

Our school will organize some activities for the Care Day, like song dedication, lunch time programmes and sports activities. The lunch time programme is a film appreciation which is about an old lady who lived alone and was very poor. Her family did not like her, so they went to England and never came back to Hong Kong. About the sports activities, we will have races, football and basketball matches. I would like to invite you and other students to join the activities.

You can also donate money to the Community Chest of Hong Kong or donate gifts like clothes, toys and dolls. And I would like to ask you to encourage your children to join the programmes organized by Po Leung Kuk and the Helping Hand.

Thank you for your attention!

Yours faithfully,
S.K. Ng

A Letter to a Friend

3C Emily Chun Lok Ming

Dear Biff,

Hi! I think you are very unhappy because your parents do not let you dye your hair. But, I think you should not hate them. Your parents do not allow you to do this, maybe it is because they think dying your hair is not good. Right! You are always a child they think, so, you must know it.

Perhaps you do not agree with me, but you must know that they want you to be a good child. Although I do not understand why you want to dye your hair, you cannot listen to all your friends. I think if you dye your hair with different colours, you will not have a beautiful outlook. Some people may not make friends with you. So, you must think about it carefully.

Lastly, you must spend some time talking with your parents and telling them you will only dye your hair in holidays, or you will pay by yourself. Let them know that you will dye it back again at the end of the holidays. You must talk with them. I think they will agree.

Good luck! Biff!

Yours,
Lok Ming

A Letter to An Exchange Student

3E Sam Hung Ho Sum

Dear Gary,

Hello, how're you getting on? It's the first time I write to you. We'll be your host family. My name is Sam Hung and I'm fourteen years old. My school is very new and the teachers are nice.

I am enclosing a photo of my friends so that you can get to know us. The boys are all from 2E, in which I studied last year. They're smart and kind. When I need help, they will lend me a hand.

I live in a housing estate in Tai Po. It is small but we feel warm in this family, so I'm sure you won't get homesick. Oh, I forgot to introduce my pet to you. It's Tony. It's lovely and loves eating carrots.

Let me tell you something about the life in Hong Kong. Hong Kong is a paradise for food and shopping. You can enjoy different kinds of food here. It is important for you to try 'dim sum' in Chinese restaurants, as it is a very famous dish in Hong Kong.

The weather in Hong Kong is hot and humid. The temperature ranges from 28-35°C, so my favourite pastime is swimming. About language, our mother tongue is Cantonese, but don't worry! Hong Kong is a cosmopolitan city, so you can speak English here. But if you are interested in Cantonese, I can teach you some.

I'm going to stop here now. I'm looking forward to seeing you soon.

Yours sincerely,
Sam

Natural Disaster

1B

Louis Chan Yan Ting

Harry Ng Wing Yip

Jason Sham Yu Hin

Ken Ip Wai Hong

Last week, we went to the cinema and watched a movie. The movie was “Day After Tomorrow”. This movie was about green house effect and natural hazards such as Tsunami, earthquakes, and rain storms.

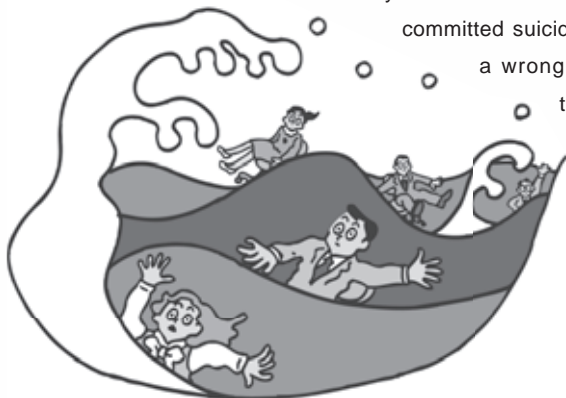

In our normal life, we can always see some natural disasters like typhoons, flooding and landslides. These kinds of natural disasters make our daily life inconvenient and people may be killed.

Other serious disasters like tsunami, earthquakes and volcanic eruptions may happen in other places. For example, a tsunami happened on Christmas day in Thailand and Sri Lanka. More than 100 thousand people died and houses were destroyed in Sri Lanka. People were homeless.

In Hong Kong, typhoons and rainstorms are common natural disasters. They had destroyed buildings and some citizens died because of the accidents caused by the typhoons. For example, a typhoon called “Wendy” had serious damage on Hong Kong. The chairman of the Royal Hong Kong Observatory at that time announced that the typhoon had gone. But after a short period of time,

“Wendy” returned. The chairman of the Royal Observatory committed suicide because he felt guilty of making a wrong announcement. Lastly, we hope

that people can fight against natural disasters and accept nature as always changing and difficult to predict.

Pollution

2B Cathy Wong Yee Ching

Pollution means making air, land and water dirty. What if dirty water gets into our bodies? What if we breathe in dirty air? Therefore, we need to protect the environment. However, what can we do?

In fact, we throw a lot of things every day, such as kitchen waste, metals, plastics, paper and dust..... Although some rubbish can rot quickly, most rubbish cannot rot away. It just stays in the ground. It results in land pollution, so we must help to make less rubbish. For example, we can take paper, plastic bottles, old newspapers and metal cans for recycling. We can also reuse the plastic bags and paper bags.

Air is around us everywhere. We need to breathe in clean air. But we always pollute the air. Most of this pollution is caused by waste gases and smoke which come from factories, public transports and restaurants. But we cannot stop breathing. We just inhale this dirty air into our lungs. Hence, we fall sick easily. Air pollution will result in acid rain. It happens when some harmful gases are emitted into the air. Hence dirty water goes into rivers and seas and kills the animals which live in the water. Acid rain can 'eat away' buildings and statues. The smog is very serious in many big cities, too.

Rivers are important for us because much of our drinking water comes from them. Rivers are also home to animals which live in water. But many rivers are being damaged by pollution. These kinds of pollution happen when chemical waste from factories are dumped into the rivers, so the poor fishes cannot live in the dirty water. Seas are also important for us because most of the fish we eat come from the sea. The seas are also polluted by oil and chemical waste; many birds and fishes are killed by the pollutants.

We should protect our earth at this moment, so we need to think of some solutions. We can make less rubbish. We should not dump any chemical waste into the water.

What a cloudy day!

2B Lillian Cheung Ying Chi

'Oh dear'! I was very sleepy. 'The lesson is very boring .I want to fall asleep.' I brushed my eyes and murmured.

At that moment, I found that I was in the hot air balloon. I was flying in the sky. I saw a lot of angels. They were very beautiful. They had a lot of colours but they could not see me. 'Woo.....'I looked out of the balloon. I felt scared. It was so high. When I was closing my eyes and praying for myself, I saw a cloud next to my balloon. The cloud was very big and long, like a tape. Suddenly, the balloon hit the hard cloud. My head was hurt. I cried, 'But... why is the cloud so hard. It is impossible. It is magical that I am not in a magic world, am I?' 'I thought. 'Am I in Hong Kong now? Who am I? What can I do now? Has the hot air balloon broken down? Will the balloon fall down? Will I die?' I have a lot of questions. Who can tell me the correct answers?' So many questions filled my mind.

'Oh no!' I screamed. The balloon really fell down. Suddenly, my shoulders had two wings. These wings were soft and white. I could fly away. Am I God or an angel?' Wow.....I am a fairy. It's impossible. I'm a special student.'

'Ling~~ling~~' What sound is this? Why is there a fire alarm? I thought.

'Cheung Ying Chi!!!Cheung Ying Chi!!!' Somebody called my name. 'Did the cloud call my name? Is the cloud angry now? I think he is very angry because he shouted at me.' I thought. 'Get up! You have slept a lot! The bell has already rung. This is the next lesson.' 'Sorry, Miss Cheung.' I said. 'Ok! Stay after school and see me.'

At last, Miss Cheung punished me for an hour. It is more horrible than the horrible dream.

My favourite hobby

2B Gigi Law Wan Tung

I have a lot of hobbies, like reading, listening to music, singing, skating and dancing..... What is my favourite hobby? Any of my friends must know that the answer is dancing. Ballet is my favourite hobby.

I have been dancing ballet for eight years and I can remember that how I started to fall for it. It happened a long time ago when I was four. One day, I went shopping with my mum. I saw a poster on the wall. There was a girl wearing a very beautiful, luxury dress. Her position was so graceful. Then I told my mum that I wanted to dance like her. So my mum sent me to a ballet school.

Over the eight years, I have learnt dancing happily although there were hard times. Many unpleasant things happened to me. I used to do some classical walk exercises but I could not catch up with the music because my legs are too long. It was really hard for me to do such move. I tried my best but I still failed to do it. I began to cry!

Last year, Miss Lee, my dance teacher, made me smile again. She held my hands and did the exercise with me. At last, I could do it. I did it very well. I was very happy!

Why do I choose dancing as my favourite hobby? Because I think it is very challenging. Also, when I dance ballet, I forget unhappiness. With ballet, I can make a lot of friends. I can learn from them. Never am I jealous of them.

To be a dance teacher is my ambition. I will not give up dancing. I believe I can be a professional dance teacher one day. I can do it. I am sure my dream will come true.

About Me

2B Ho Tsz Kei Cindy

My name is Cindy Ho Tsz Kei. I am a Form Two student of Sun Fong Chung College.

I am a pleasant girl. It is easy to make me laugh. So I laugh all the time.

I am good at languages but I am weak in oral English. My favourite subjects are English and Music. I hate P. E. and Chinese. I don't like to do homework because I am too lazy.

My hobbies are sleeping, reading and eating. I like to do reading when I am on the bus and in the reading period. I like to eat strawberry, cheese and chocolate.

I am a teenager, so I enjoy traveling. I often go to the tourist attraction of Hong Kong in holidays. I like to go to the Peak by tram.

I love to go to school. I want to see my friends every day and I want to meet some new friends from other schools.

That is all about me. I hope I can have a wonderful life.

Sports

2B Steven Man Ka Ho

Physical exercise is necessary for health. It improves our health. There are various types of sports, including indoor and outdoor ones like swimming and skiing.

Swimming, for example, exercises all the muscles of the body. This sport requires a lot of strength.

Football is one of the most popular sports in Hong Kong. A match between two strong teams is often a tough struggle. In football match, accurate shooting is very important.

Basketball is also a popular sport. In a basketball match, the court is often filled with an atmosphere of suspense. The players wear shorts for easy movement.

In recent years, the Government has put much emphasis on promoting sports. Some modern and well-equipped stadiums have been built like the Hong Kong Coliseum and the Jubilee Sports Centre in Shatin.

In Hong Kong, each school holds a Sports Day every year. Many records are broken every year, too.

Sports can make us strong and energetic. Athletes must appreciate the sports spirit and avoid getting into a temper. Most of the sports games need our team spirit.

Please try to be a good player and observe the rules of a match!

1B Ho Wan Chin

Chocolate

Chocolate is sweet
 Chocolate can make us happy
 Chocolate is my best friend when I am sad
 Because it can make me feel good

Strawberries

Strawberries are red
 They make me feel hot
 Every strawberry is different
 Sometimes sour, sometimes sweet
 Like our life.

Watermelon

Watermelon is like us
 If we learn and improve ourselves
 We will be sweet
 We will have more water
 If we don't do anything
 We can't get success in the future

A Poem

2B students

Happy to receive red packets
 Lucky money
 A lucky word for me
 A laughing cartoon rooster
 Laughter everywhere
 I feel surprised

Fun at the shopping centre
 With my kind cousin
 Buy a cute, colourful T-shirt,
 Eat delicious chocolate ice cream
 See big cinamaroll cartoon
 I feel happy

Chat with friends in China
 Excited playing fireworks
 Fun shopping, buying new clothes
 Red packets
 Kung Hey Fat Choy
 I feel happy this holiday

Boring homework
 Lots of homework to do
 Forget my lunch
 Very tired
 I want to sleep
 I feel bored

Nice Bangkok in Thailand
 Amazing dream world to play at
 Many animals in the zoo
 The beautiful views, special yellow temples
 But dirty smelly toilets
 I am happy in Bangkok

A lovely Valentine's day
 A special day out together.
 I miss her voice, her smile, everything
 On the other days
 Happy with her
 On that day

M.C. Team (A report)

1B Jonathan Tam Cheuk Hei

I would like to talk about my feelings in the Master of Ceremony (M. C. team). The teacher in charge of the team is Mr. Kwok Ka Ho. Mr. Kwok is a Chinese History teacher. I think he is very smart and he is a good teacher. He has taught me many things.

In the M.C. team, I always feel very interested and excited, especially when I have to go up onto the stage and talk. There are a lot of sudden notices, so I will not have a lot of time to practise the announcements. Thus, it is very challenging to be on the stage.

I think the M.C. team is more fun than any other clubs in our school. The M.C. team will not let you feel bored. It will always make you feel excited.

So I like the M.C. team very much. I hope everybody will like the M.C. team.

A News Report on An Accident

Vincent Leung

Good morning, today is the 7th June 2046. At eight o'clock this morning, the police found two young boys died on Tai Po Road in a car park. Yesterday, they were killed by a car because they were walking along the road when a car crashed into them at high speed. After that, the car went away quickly. Until this morning, some teachers from Sun Fong Chung College had seen the two boys and reported it to the police. The two boys were still alive when they were being sent to the nearest hospital by an ambulance. Unfortunately, they both died because of serious injuries. Their family members were very sad and they cried. Luckily, the police found the driver and he was arrested for murder and not reporting the case to the police.

Lily Lee, SFCC News.

How to make Bean Curd Soup

1C Tan Cheung Kam Pui

Welcome to <Tan Sir Teaches Cooking>. If you want to make the Bean Curd Soup, you should prepare the following ingredients. You have to buy a piece of bean curd, a can of corn, a can of chicken soup and several mushrooms. For seasonings, we use a teaspoon of salt, a teaspoon of sugar, two teaspoons of soy sauce and two teaspoons of corn starch and a little pepper.

First, you have to soak the mushrooms in water for at least two hours. Cut them into pieces. Put a little sesame oil, sugar, pepper and salt and mix them together.

Wash the bean curd and slice. Cut it into small cubes. Get 500ml of water from the tap. Boil the water. Put the seasonings into the water, when the water is boiling again, put everything into the water. Wait for five minutes, then, it is ready.

You can serve it in a bowl. If you don't remember, you can read the recipe on my website again.

Good luck!

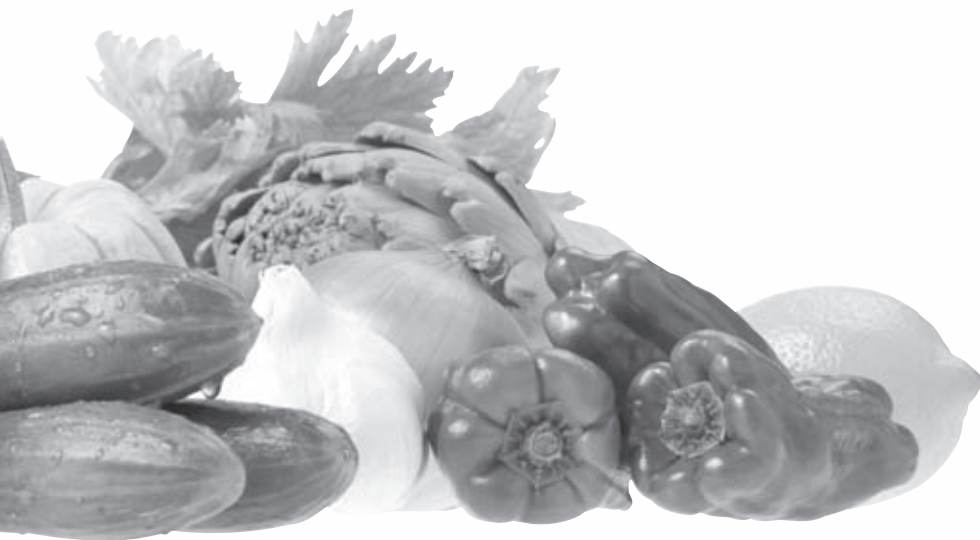

How to make Curry Chicken

1C Wong Kai Ming

Today is my father's birthday. I want to cook curry chicken for him.

First, I need to buy a chicken, four chillies, three potatoes and a bag of curry powder. Next, I cut up the chillies carefully. Then I weigh half a kilo of chicken and slice the chicken with a knife. I sprinkle a little salt and curry powder onto the chicken before cooking. Pour 250 ml of water into a frying pan and sprinkle a little curry powder into the water. After five minutes, I put the chicken pieces and chillies into the frying pan. After the chicken is cooked, put the chicken pieces into the curry sauce. After twenty minutes, the curry chicken is ready.

If you like to eat very spicy food, you can add more chillies. The curry chicken is very delicious. I think many people like to eat this dish. I will eat curry chicken with my family for dinner tonight.

My hobby

1C Alan Luk Yik Lun

I want to tell you my hobby. It is collecting photos of buses. I collect bus photos from Hong Kong, Macau and Holland.

I collect bus photos from Holland because my aunt lives in Holland. I collect bus photos from Macau because I often go there for sightseeing. Now I have over a hundred bus photos. I have over fifty bus photos from Hong Kong and the others are from Holland and Macau.

This is my bus album from Hong Kong, so this is the thickest album.

It is easy to collect bus photos. You can take photos or buy them from shops. You can also find photos from libraries. I like to collect bus photos because it is very interesting. You can have fun from taking bus photos. You can know the buses of different countries.

Well, that is all. Thank you for listening to me!

My Collection

1C Anson Poon Kam Yin

Hello everybody! I would like to tell you my hobby. It is collecting Pokemon cards. They are different colours like green, yellow, blue, white and purple. They are small and rectangular. They are made of paper but they are very hard.

I started to collect them in Primary Four. I have collected these cards for four years. Sometimes I would show them to my friends because they are beautiful.

I have about two hundred and forty cards now. A box of cards costs \$78 dollars and a bag of them just costs \$38. So on average, each card costs \$1.3 dollars. The cards are quite dear.

I buy them in card shops. My mother usually buys the cards for me, but I sometimes buy them myself. I love collecting the cards very much, but they are so expensive. Therefore, I can't buy many of them.

Myself

1C Sandy Hui San Ting

Hello! I'm Sandy. I am studying in Sun Fong Chung College. I am twelve years old. I have a ponytail and I do not wear glasses.

I like doing exercise. My favourite sport is running. I also like listening to music and reading books. Who is my favourite star? My favourite stars are Twins because they sing beautifully. I have a father, mother, two younger sisters and one little brother. I love my school more because I can talk with my classmates at school.

My school is in Tai Po. I think it looks like a hotel because it is big. I go to school at seven forty as I live close to school. I want to be a lawyer in the future because I want to help the poor people.

Myself

1C Wendy Kwong Wing Chi

Hello! I am Wendy. I am studying in Sun Fong Chung College. I am twelve years old. I am short and thin, and I have black hair.

I like sports. I like running and swimming. My hobbies are swimming and drawing. Kelly Chen is my favourite star because she is tall and beautiful.

I live in Central Plaza. My home is messy. I have a big family, so I share a room with my sisters, Fanny and Joey. They are fourteen and ten years old respectively.

My school is in Tai Po. I usually go to school at a quarter past seven. I want to be an art teacher or a sports teacher.

A Day in SFCC

2B Micky Fong Tak Lok

I am a member of Big Brothers and Big Sisters Mentor Scheme. Nice to meet you. My name is Chris Wong. I would like to talk about the activities that we have at Sun Fong Chung College.

Today is Wednesday. You can go to the football court to play football at lunch. You can also go to the tuck shop to buy some food to eat at lunch.

During lunch, you can play some games or go to the computer room. I will go with you. But you cannot run in the classroom. If you run in the classroom, the prefects will mark down your name, class and class number. If you have any questions, you can ask me or your teacher. We will help you. And we can go to play in Room 101. I will tell you other activities in Sun Fong Chung College. See you tomorrow.

A Speech about Typhoons

2C Tommy Wong Chun Hong

Good morning Principal, teachers and fellow schoolmates. This is Chris Wong from 2B. I am a committee member of the Geography Club. Typhoons often happen in Hong Kong. So, today, I would like to talk about typhoons.

Typhoons always hit Hong Kong in late summer and early autumn. This affects us a lot. When the typhoons hit Hong Kong, there will be heavy rain, thunderstorms, flooding, landslides and so on. Flooding will damage the farms. Typhoons would cause traffic jams. The finance exchange activity will also be cancelled. Hong Kong will lose one billion dollars when typhoons hit Hong Kong.

Typhoons are very dangerous. Typhoon signals will be hoisted by The Hong Kong Observatory when there is a typhoon. Usually, there are five typhoon signals. They are No. 1, 3, 8, 9 and 10.

People should know what to do when there is a typhoon.

When typhoons hit Hong Kong, we must stay indoors because we can be safer. We should lock the doors and windows because it can protect the house. We must not do anything dangerous. For example, we must not go to the beach and high ground because it will be very dangerous there.

Natural disasters cannot be controlled by us. So we must do something to protect ourselves when there is a disaster. I hope you can pay attention to my advice and protect yourselves. This is all about my sharing. Thank you.

A Speech about An Exchange Student

3A Leung Ka Lai

Good morning Principal, teachers and schoolmates,

I am Chris Wong from 3A. Today, I will share my experiences about a host for an exchange student, Gary Grey, who stayed with my family for a year.

Gary Grey was a Japanese and he could speak Japanese, English and Putonghua. When he was talking to his friends in Japan, he would use Japanese. Yet, when he talked to me or my family, he had to speak English and Putonghua. It was because we did not understand Japanese, so I was sorry about that! He was the same age as me, so we always talked about something we were interested in, just like our favourite subjects, favourite food and favourite sport. His favourite subjects were Putonghua and Science, so he could speak Putonghua very well.

Chinese noodle, sushi and Indian food are his favourite food. So, my mother always cooked some Chinese noodles and curry for him. He always felt happy and said to my mother that he admired her because she could cook some delicious food after he had finished his food. Also, I always played baseball and basketball with Gary and my friends in the basketball or baseball court. We were excited and happy when we played those games. It was because those games were Gary's favourites.

I was very happy when Gary stayed with me for a year and it was touching, too! He was impressed by Mid-Autumn Festival. Last year, he told my family that his parents had died when he was 10 years old and he envied me. He was very lucky because he could stay with my family for a year and he felt what a family was. After that, I learnt how to protect my family and love my family, so I wanted to say thank you to Gary Grey.

This is the end of my sharing. Thank you!

Studying in the States

3B Chan Ying Chi

It is my dream of studying in the United States.

Firstly, I like the education system in America as the class size is usually smaller and students can dress casually at school. Therefore, teachers can spend more time on teaching. Dressing casually also gives students a sense of relaxation.

Secondly, people in America can live in spacious houses with beautiful gardens rather than expensive but tiny apartments, which makes life more comfortable. There are many lovely parks too! Furthermore, for those like the machine games, the Disney Park is a good place to visit.

Thirdly, I cannot miss some festive occasions in America, like Halloween. It is very interesting because kids can have candies from different families and make fool with somebody. This is really a big fun.

Lastly, I can spend a white winter in America too. Such a lovely snowy view will inspire our imagination and then the beautiful scenes of fairy tales will appear on our mind. Besides, we can pile up snow to make a classical snowman. If you like eating, a big turkey should be a good choice for you in winter.

America is a wonderful place. There is a lot of freedom at school and there are many good places to visit. I hope I can go there and surely, this experience would be very invaluable.

A Speech about An Exchange Student

3B Wendy Cheng Shuk Kwan

Hi! I am Chris Wong. I am a girl from Hong Kong. I am 14 years old now. I like playing computer games and reading books. And I love singing very much. Today, I want to share my experience as a host for an exchange student, Gary Grey, who stayed with our family for a year. Now, I will introduce Gary to all of you!

The exchange student was called Gary Grey. He was the same age as me. He was a Japanese. He was very kind. When he came to my family, he felt very homesick and lonely. So I told him a lot of interesting things. He could speak in Japanese, English and Putonghua, but he could not speak in Cantonese. So I talked with him with my poor English and Putonghua. He loved playing baseball and basketball. But I was not interested in it. He always watched basketball matches when I was sleeping. He loved eating Chinese noodles, Japanese sushi and Indian food. I always cooked some noodles for him, but he thought it was not delicious. About his favourite subjects, his favourite subjects were Putonghua and Science. I did not like Science, it was because I thought Science was not very interesting and I thought that was very difficult and hard to understand. But he said that Science was fun to learn, you can learn some useful things from it. About his favourite Chinese Festival, he liked Mid-Autumn Festival most, he said that he liked his festival because he could play lanterns and eat mooncakes. He said that this was a very special experience for him.

Secondly, I want to share my family lives with all of you. Gary Grey, he was an active and patient person. He has a lot of friends. At school, we always played and did homework together. At home, he liked playing games. I played with him if I had spare time. When he stayed with my family members, he was very happy and comfortable. He did not feel homesick. While he was playing with my friends, he felt very lonely and shy, it was because all of my friends were girls. He was not used to understanding our family habits. While he was alone, he felt very depressed and he would be homesick.

A Picnic

1C Ice Chan Tsz Ping

The Form One students had a picnic in the countryside last week. After they had arrived there, an old man said to them, 'There is a big monster in the reservoir. You need to be careful.'

However, the students did not trust the old man. They laughed. After that, the old man went away.

The children played happily. They played badminton. They had a BBQ and some looked at the view. Suddenly, a big monster rose out of the reservoir. A girl saw that. The monster was very ugly. It had three eyes, a big mouth and two big hands. They were very afraid of it. So she ran away with the boys.

The monster said, 'your voices are so loud that I can't sleep. Please keep your voices down!' After the monster had said that, it went to sleep again. At last, the students trusted the old man. They were happy. They did not make any more trouble!

A Robot

2E Wendy Lam Wing Sum (3)

'Oh! Dear! Who can help me?' Tim said. Tim was lazy to do homework. So, he wanted to get help from his family. 'Oh, Tim, you should do your own homework, so I can't help you. Sorry, Tim', his mother said. 'Never mind!' Tim said. Tim wanted to get help from his father. 'Daddy, can you help me?' Tim asked. 'What can I help you?' His father asked. 'Do my homework,' Tim said. 'Tim, you should do your homework, I can't help you,' his father said. 'OK', Tim said. He was unhappy. He wanted to get help from his sisters, Amy and Emilie. 'Sorry, Tim, I have to go to my friends' home now,' Emilie said. 'I know,' Tim said.

Tim was very happy. 'Daddy and mummy did not help me. Amy and Emilie did not help me too!' Tim said. He was having lunch. Then, his robot, Mo Mo, came in. 'Hey! Mo Mo.' Tim said. 'Hello! Tim' Mo Mo said. 'Hi! Mo Mo, can you help me do my homework, please?' Tim asked. 'Sure, sure!' Mo Mo said. 'Can you help me?' Tim asked. 'OK, no problems!' Mo Mo said. 'Let's do homework, Mo Mo! What are you doing?' Tim asked. 'Doing homework,' Mo Mo said. 'I was not playing,' Mo Mo said. 'OK, let me tell you, you cannot do homework now,' Tim said. 'I see' Mo Mo said. He went to the sitting room. Tim was doing homework! He did homework the whole afternoon. 'OK, I can do my own homework,' Tim said. 'Hey, time for dinner now,' his mother said. 'I know, I am coming now,' Tim said. He went to the dining room quickly to have dinner. But Mo Mo went into Tim's bedroom. It played with his homework. When Tim returned to his bedroom..... 'Mo Mo!!' Tim shouted angrily.

The next day, Tim went to school. Some children handed in the homework to the teacher. 'Tim, where's your homework?' His teacher asked. 'Sorry, Miss Lam, I can't hand in the homework because Mo Mo messed up my homework,' Tim said. 'Today, you need to do your homework at school. Is that clear?' Miss Lam said. 'Yes, I got it,' Tim said.

That day, Tim did his homework the whole night.

The Person I Admire

1A Ho Po Yee

I would like to put Arina Tanemura in the Hall of Fame. She is tall and slim. She has black hair.

Arina Tanemura is very cheerful, talkative and kind. She has many fans because she draws beautiful and lovely pictures. I am also her fan.

Arina Tanemura's job is drawing comics. She liked drawing comics very much when she was four years old. She started to do this work at 18 years old.

She was born in Japan on 12 March 1978. She is now living in Japan too. Her favourite foods are noodle and cake. Her favourite colour is red. Her favourite pet is fish. Her favourite flower is rose. Her favourite sport is rhythmic gymnastics.

I like Arina Tanemura because I think her comics are very good!

The Person I Admire

1A Rachel Lai

I admire Leo Koo. He is a very famous singer. He is very tall. He is of medium height. He is about 1.78 metres tall. He is very handsome. He has short straight hair. He is strong.

He is very generous, nice and kind. He is always cheerful and very friendly. He likes to collect the watch of Mickey Mouse. He likes to play computer games in the recording room. My first CD is about him. My father gave this CD to me.

I admire him because he is very hardworking. His songs are very pleasant to listen to. In 2004, he won fourteen prizes. I am very proud of him. Also, he is very devoted to music. His image is very healthy. He is my favourite idol!

Fashion Design - I Want to be a Model

1B

Abi Lam Lei Wing

Michelle Lee Hoi Ki

Cindy Sze Yin Ting

Natalie Ma Tik Yiu

Karen Cheung Hoi Shan

When I was young, I went to watch a fashion show. I saw a model having a catwalk on the stage. I think she was very professional. She was very pretty. Suddenly, I have an idea, "I want to be a model walking on the stage. People will praise me for doing my job well."

I started to find some information about becoming a model. Actually, I have to learn etiquette, posture of model, and how to walk on stage. Also, I have to think of facial expressions when I was having the show. I need to know how to wear make up. The most important is, I have to keep fit.

Now, I am a famous model. Everyone knows my name. Today, I participated in a model competition and I won. But I do not know the reasons for winning this competition. So I asked my friend, Mancy. She said, "You have confidence on the stage. You also have a suitable facial expression when you are wearing different clothes in different moods." If you want to be a model like me, have confidence in yourself and try your best when you are on stage.

Movies

1B

Camellia Chan Shu Kei

Niko Chan Wing Man

Vicky Chiu Yik Lam

Kerrie Hung Kiu Wai

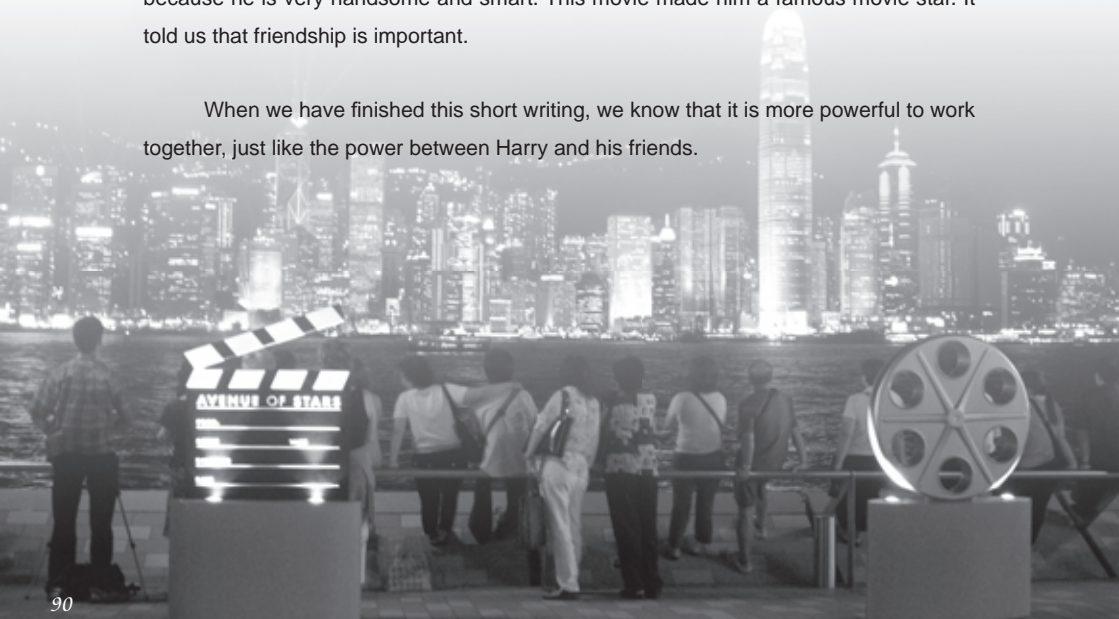

Maya Tang Hok Man

Movies make people feel excited. We can learn many things from movies. There are many different kinds of movies, for example, romance, love story, action movie, martial art, cartoon and so on.

In recent years, a famous movie called Harry Potter was getting its fame all over the world. The story is about a boy called Harry Potter. One day, he got a letter from a magic school. The teacher from the magic school brought him to the school and they started an exciting adventure there. They learned different knowledge on magic. Finally, Harry Potter became a famous wizard.

This movie was rated among the world top movies in 2004. After watching this movie, we think that it is very fun and interesting! Our favourite character is Harry Potter because he is very handsome and smart. This movie made him a famous movie star. It told us that friendship is important.

When we have finished this short writing, we know that it is more powerful to work together, just like the power between Harry and his friends.

Germany – Brochure

1C Brian Chau Mun Leung

1. Where's Germany?

Germany is in Central Europe. It is a rich country in Europe. The full name of the country is Federal Republic of Germany. Its total area is 357,021 sq. km and there are 82 million people living there. Germany's capital is Berlin and the language is German.

2. Germany's Food

The German loves sausages very much. They can eat sausages every day! Apart from sausages, the Germans loves beer, bread, cheese, ham and wine.

3. Germany's History

In the Second World War, the head of the Nazi Party was Hitler. He killed 100 million Jews. At last, He also killed himself.

4. Germany's Weather

Germany is wet and there is not much sunshine. It is always cold and cloudy, so if you go there, you must bring enough clothes.

5. Germany's major industries

Germany's major industries are motor vehicles, iron, steel, coal and clothing. Therefore, Germany is a rich country.

6. Come and visit Germany

If you like to travel around Germany, come and visit us now. We are sure you will have a nice trip.

The Person I Admire

1C Mimi Lo Sin Man

The person I admire is my father, whose name is Lo Cheuk Kay. He is 1.73 metre tall, thin with little grey hair. He is over 40 years old now. He is kind, hardworking and helpful.

He feels relaxed when he goes fishing. However, when he is at work, he works very hard. Sometimes, he works till very late at night. At home, he is very cheerful, patient and happy. He often talks with me and helps me with my lessons. Sometimes, he does housework and cooking.

I think my father is a generous man because he donates over \$2000 to a charitable organization to help poor children every year. My father is loved and respected by our family, relatives and his friends.

About Me

2B Cara Chung Wai Shan

This is Cara Chung Wai Shan who is studying in Sun Fong Chung College .My school is a good place for students to study because it is on a hill and far away from the downtown.

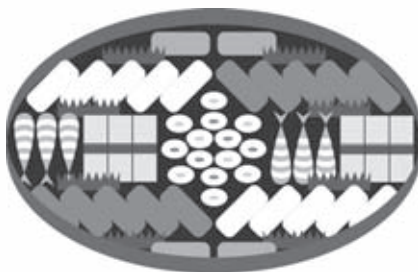

I have a lovely family with my father, mother and two younger brothers. I like my younger brothers very much. One of them is studying F.1 in Kau Yan College and the other is studying P. 1 in TPOMPS. They are so kind to people but they are pretty foolish. They do not know how to ride a bike.

I enjoy my daily life very much. I enjoy going to school because I feel great when I am with my friends. I like to feel the way they make me feel when I am with them.

I have many hobbies. One of my hobbies is eating Sushi! Sushi is made of ice and some food, for example, egg, fish, seaweed and so on. I like reading as well. Reading makes me learn the things that I have no chance to learn in school.

My favourite poet is Victor Hugo. I read about eleven novels a week.

I am only 14 and I hope I will have a wonderful life when I grow up.

A Special Memory

2B Kevin Yau Ting Kit

My memory is music and art.

I am learning to play the piano. I love music. I love playing the piano. I think music can tell people what I think.

I love art too. I love to draw because drawings can help me to express so many feelings. Every week I have seven Art and Design lessons.

I feel very happy when I think about art and music. I love the Art and Design lessons and the Music lessons.

In my mind, they are my most remarkable memories, so I think I love them more than computer games. I do not like talking very much, but I like to tell things in my drawings and when playing the piano. I do not need to say anything, yet people will know what I think. I think that is good.

Maybe my songs and art work are not very good; maybe you feel they are ugly, but I think my remarkable memories lie on them.

Everyday, I draw pictures and I play the piano for at least 45 minutes. I love them, so when I have nothing to do, I will think of them.

Holiday in Mauritius

2B Richard Mok Ho Sum

When I was five years old my parents took me and my sister to Mauritius for our summer vacation. My mum's Japanese friend and family also came with us.

In Mauritius, I saw some of the greatest things of my life. There were huge water- lilies we could actually stand on them and we sank into the water! My father carried my sister up and put her on one of the lilies. She sat on it and was scared to stand back up, so she floated to the middle of the pond and we had to hire a boat to rescue her!

After that, I remembered playing tag with a western girl near the hotel swimming pool, but I slipped and fell into the pool. I did not know how to swim, I nearly drowned. But thanks to my dad, I was saved again. Now, thinking back, I really wanted to know what the lifeguards were doing. They must have been busy looking at the bikinis.

In Mauritius, I tasted some of the most delicious food I have ever tasted.

I really enjoyed that vacation at Mauritius. It was great fun and full of happiness. I really want to go there again someday.

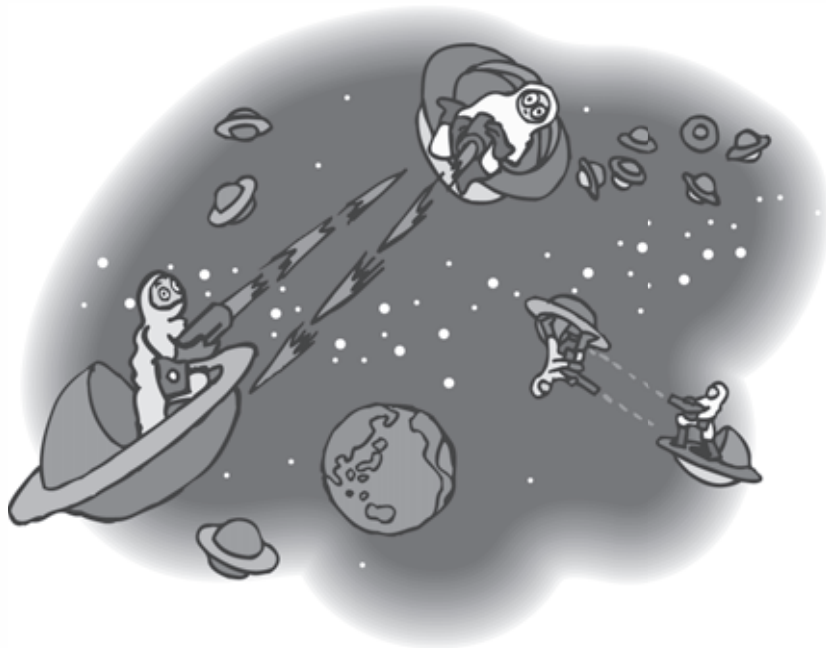

My Favorite Movie Character

2C Chan Wing Tai

My favorite movie character is a Jedi. He is a knight in the movie 'Star War'. He has a laser sword. He likes keeping peace and righteousness of the world. Jedi likes wearing skinny top and tight pants. He is a divine savior of the world. His ultimate weapon is the laser sword which kills monsters.

Jedi has another name which is skinny top superman. If he wears the skinny top and the tight pants, he will become a superman. Nobody can defeat him.

I appreciate the Jedi because he likes keeping peace and righteousness of the world. I like him very much.

My Favorite Star

2C Wan Ho Tin

My favorite star is called Bruce Lee. He was not very tall but he was very muscular. He looked cool and he performed well in many films. They were all about kung fu and martial art.

I like him very much because he was very talented. He was my super hero. Unfortunately, he died early when he was only thirty years old. He was a hero among the Chinese. His punches and kicks were very powerful. He fought with bad guys in his films and won over them. He is our pride, even when he had died for years.

I want to be like him because he made Chinese kung fu become well known to others. All people know that Chinese kung fu is very powerful.

Do you think your teachers give you too much homework?

2E Kong Sai Ho

I think my teachers give me too much homework. I have a classmate named Tim who is very lazy to do homework. One day, he wanted to get help from a robot. This robot looked like a ball, and it was blue. We called it 'Hero'.

Hero always taught us homework and played with us. That day, Tim talked to Hero. He said, 'At school, I have to do a lot of homework. I am tired and I feel having a headache.' Hero said, 'Let me help you!' Hero took out a pen and a correction pen to do the homework.

The next day, the teacher gave me back the homework. He punished me, 'Are you crazy? The questions were so easy. Why did you do get it wrong?' So, he was very sad.

When he told me this incident, we laughed at him because Hero did not know English, but Tim let Hero do his English homework. Can Hero do them right? Of course not! After that day, Tim studies harder. Now he is the best in our class.

Fund-raising activity for the tsunami victims

3B Jennifer Ha Kwok Ling

Recently, our school held some fund-raising activities for the tsunami victims. For example, Our school flag was halfly-raised to mourn the victims. Teachers, students and principal paid a silent tribute to the tsunami victims. We had a 'Simple Lunch' on that day and a fund-raising stall at the Fun Fair in Tai Po Flower Market during the Chinese New Year.

'Simple Lunch' was held at lunchtime. Immediately after the Christmas holiday, students, teachers, parents and principal only had sandwiches with butter and ham and a bottle of water for lunch. We experienced the hunger of the poverty-stricken people and we also donated the lunch expenses for helping the tsunami victims. This activity cost each student \$10, \$50 or more for each adult. In this activity, we had parents' sharing, song dedication, principal's sharing and a silent tribute to tsunami victims. It aimed at helping the people in need. Altogether, \$37, 562, 40 was raised and donated to the Hong Kong Red Cross South Asia Relief Fund.

The other activity is the 'Fun Fair' in Tai Po Flower Market during the Chinese New Year. We sold some candles, hand-made toys and some key holders made by students, too. And also we sold environmental carton and so on. This activity was to raise fund for United Nations Children's Fund (UNICEF).

This series of activity is very meaningful. It can help the tsunami victims a lot.

Fund-raising activities for Tsunami victims

3B Samantha Poon

Our school had organized a series of fund-raising activities during January and February this year to raise money for the Tsunami victims.

I believed that the Tsunami was the most miserable incident in 2004, and my school, Sun Fong Chung College, had organized many fund-raising activities to help the people in need.

The first programme that we held was a special seminar of Tsunami, a natural disaster of the first day when we came back to school after the Chinese New Year Holiday. In the special seminar, I learnt about the cause of tsunami and the hardship that the victim faced. The programme was well-received by all students, teachers and parents. We had a simple lunch together in the school hall. We sang a song, the teachers gave us a speech and a powerpoint presentation during this simple lunch. I thought this was a meaningful lunch which allowed us to understand what the victims had been facing.

The most impressive fund-raising activity was the Fun Fair in Tai Po Market during the Chinese New Year. I participated in it and I was the group leader of the event! When the people heard that our school was raising money for the tsunami victims, they were very happy and generous of buying our products. Their generosity was truly touching.

After these series of events, we have learnt the importance companionship and support for the needy. The fund-raising activity was so successful that my school has raised HK\$38339.6 which has been donated to UNICEF on April 2005.
